

REMCORE

SoundGate®

Purpose/Features

The REMCORE is a wired remote that connects to any SoundGate CORE interface and lets you control your connected iPod or Zune device. The buttons on the REMCORE mimic the controls on your iPod or Zune device, providing easy control of your mp3 player. The included holster lets you mount the REMCORE for easy accessibility or secure storage when you're not using the remote.

Go to www.soundgate.com to see how the SoundGate CORE can seamlessly integrate your iPod or Zune Device into your vehicle's audio system!

Simple-fi.™

If you experience problems, call SoundGate Technical Support at +1-800-256-0808, or email us at sgtech@soundgate.com.

Installation

REMCORE

SoundGate CORE (NOT INCLUDED).

The SoundGate CORE is part of the PDCBLPAK, ZNCBLPAK, and many other interfaces. See www.soundgate.com for further details.

Holster. Mount the holster by using the integral screw holes or by attaching velcro strips.

Connect to the center **REMOTE** port (3.5mm) on your CORE interface.
